RESUME SUMMARY

Hi, I'm Dhiraj — a frontend developer with a passion for building clean, responsive, and user-focused web applications. My journey into web development started with a simple curiosity about how websites are made, and it quickly grew into a full-time passion. I specialize in HTML, CSS, JavaScript, and frameworks like React, and I love bringing designs to life in the browser. Whether it's crafting pixel-perfect layouts or optimizing performance.

INTERNSHIPS

Delhi Transco Limited | June 2025 - August 2025

- During this internship, I will be responsible for handling the frontend development and working to enhance its functionality and design. Throughout the internship, I aim to strengthen my skills in React.js, gain a foundational understanding of backend development using Express.js, and develop strong proficiency in mobile responsiveness, with a focus on a mobile-first approach.

PROJECTS

Personal Portfolio Web App | August 2025 - August 2025

- This is my first portfolio website built using React.js.
Through this project, I aim to deepen my understanding of React.js and enhance my skills in utilizing Tailwind CSS for efficient and responsive UI design. I am also implementing React Router DOM to manage seamless navigation across pages and integrating GSAP (GreenSock Animation Platform) to bring interactive animations to life.

This portfolio serves both as a showcase of my current capabilities and a platform to apply and refine modern web development practices.

Walmart full ui clone | May 2025 - June 2025

- Created a responsive UI clone of Walmart's website, focusing on layout, navigation, and interactive elements using HTML, CSS, and JavaScript. Emphasized a mobile-first approach and smooth user interactions.

TechItEasy a ecommerce website | November 2024 - February 2025

- (MERN)Developed a full-featured eCommerce platform named TechItEasy using the MERN stack. Implemented user authentication, product listing, cart functionality, order management. Built responsive UI using React, RESTful APIs with Express and Node, and used MongoDB for scalable data storage. Focused on performance optimization, secure data handling, and a smooth user experience.

AWARDS AND HONOR

- Me and my team own first prize for develop and present a good Android app

ACHIEVEMENTS

- All rounder in BCA
